

Possibilities for further studies

A student who has completed the Soil and Water Management - Master’s Programme and been awarded the qualification fulfils the specific entry requirements for third-cycle studies at the Faculty of Natural Resources and Agricultural Sciences in the subject

- Soil Science
- Environmental Assessment

The specific entry requirements are based on both first and second-cycle studies. Detailed requirements for each third-cycle subject area are shown in the respective study plan for the third cycle, see link

<https://internt.slu.se/en/research-education-ema/phd-education/responsible-committees-and-director-of-studies/postgraduate-subjects/postgraduate-subjects-at-the-nl-faculty/>

This appendix to the programme syllabus was approved by the study programmes board on 12 November and is valid as of the 2007/08 academic year. (Reg. no SLU ua 30-1558/07).

Study plan for Soil and Water Management - Master’s Programme

Programme structure for students admitted in autumn 2017.

	Period 1	Period 2	Period 3	Period 4*
Year 1 2017/18	MV0204 Water and solute transport in the soil-plant system, 10 credits BI1087 Introduction to Masters study, 5 credits BI1094 Contaminated soils - Risk Assessment and Remediation, 5 credits	MV0205 Soil and water chemistry, 10 credits BI1225 Soil biology, 5 credits	MV0194 Land use and watershed management to reduce eutrophication, 10 credits TE0008 Geographical Information Systems II, 5 credits TN0268 Systems analysis for sustainable development, 5 credits	MX0096 Applied environmental assessment, 10 credits MV0172 Biogeochemistry - element cycles and climate change, 5 credits
Year 2 2018/19	MV0197 Water management, soil conservation and land evaluation, 10 credits MV0206 Soils of the world, 5 credits	BI0876 Safe nutrient recycling, 10 credits MX0124 Risk assessment of pollutants in soils and waters, 5 credits	EX0431/EX0430 Independent project in Environmental Science/Soil Science – Master’s thesis, 30 credits	

* Possibility to do independent work at Masters level 15 credits

In order for the degree certificate to state that the programme was completed according to the programme syllabus for the Soil and Water Management - Master’s Programme the following requirements must be met:

Approved compulsory programme courses of 30 credits comprising

- Soil and water chemistry 10 hp (MV0205)
- Soil biology, 5 hp (BI225)
- Soils of the world, 5 hp (MV0206)
- Water and solute transport in the soil-plant system, 10 hp (MV0204)

Furthermore elective courses of at least 45 credits of the following courses are required

- Applied environmental assessment, 10 credits (MX0096)
- Biogeochemistry- element cycles and climate change, 5 credits (MV0172)
- Geographical Information Systems II, 5 credits (TE0008)
- Introduction to Masters study, 5credits (BI1087)
- Risk assessment of pollutants in soils and waters, 5 credits (MX0124)
- Safe nutrient recycling, 10 credits (BI0876)
- Water management, soil conservation and land evaluation, 10 credits (MV0197)
- Land use and watershed management to reduce eutrophication, 10 credits (MV0194)
- Contaminated soils - Risk Assessment and Remediation, 5 credits (BI1094)
- Systems analysis for sustainable development, 5 credits (TN0268)
- Research internship, 15 credits (MV0208)

For a degree with **Soil science** as the main field: Approved independent project of 30 credits in Soil science, according to instructions for the programme.

For a degree with **Environmental science** as the main field: Approved independent project of 30 credits in Environmental science, according to instructions for the programme.

This appendix to the programme syllabus was approved by the Programme Board for Natural Resources and Agriculture on 20 September 2016 (SLU ua 2016.3.1.1-5166).

Instructions for independent projects

All independent projects (degree projects) must follow the joint guidelines that apply for independent work at SLU (REB 2011-07-01, Dnr SLU ua Fe.2011.3.0-2336). This means that they are to be managed under the same routines and remits as other higher education.

Independent projects are tied to a syllabus and the guidelines state that for projects comprising 15 credits or more, the syllabus must specify that they are to be published in Epsilon and examined for plagiarism in Urkund. In exceptional cases publication may be delayed; if so this must be stated in the student's individual work plan. The individual work plan is to serve as an appendix to the curriculum and must specify how the independent project will fulfil the intended learning outcomes related to the degree. The supervisor and the examiner may not be the same person, and the same guidelines apply for independent project examiners as for examiners on other courses (REB 2011-07-01, Dnr SLU ua Fe.2011.3.0-2335).

Agreements with external clients are handled in a separate contract between SLU and the client. In cases where students have an external supervisor there must also be a principal supervisor at SLU who is responsible for ensuring that the project is carried out in accordance with SLU's guidelines and the current syllabus.

In addition to the general instructions that apply for all programmes and to the instructions in the syllabus for independent projects in Soil Science and Environmental Science (Independent project in Soil Science – Master’s thesis and Independent project in Environmental Science – Master’s thesis) an independent project on the Soil and Water Management - Master’s Programme must be related to the intended learning outcomes specified in the programme syllabus.

This appendix to the programme syllabus was approved by the study programmes board on 24 April 2008 and is valid as of the 2007/08 academic year.
